# Random possibly useful slides on VF, OCP, etc.

09/2017

Value Flow
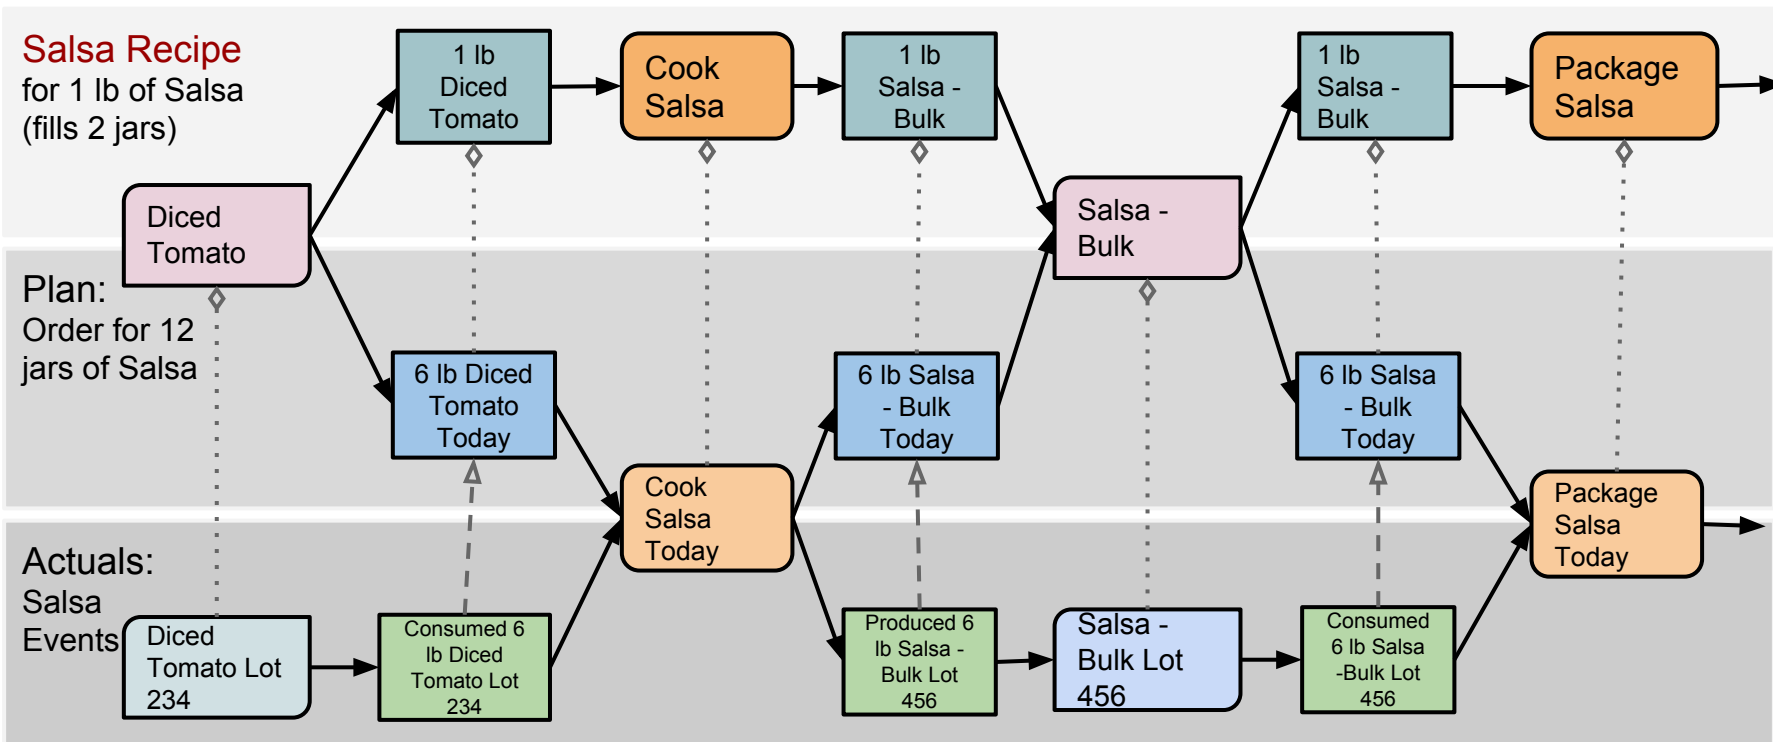

OCP has 3 levels...and they go together like so

The recipes and planning have created a context to easily log the actual work.
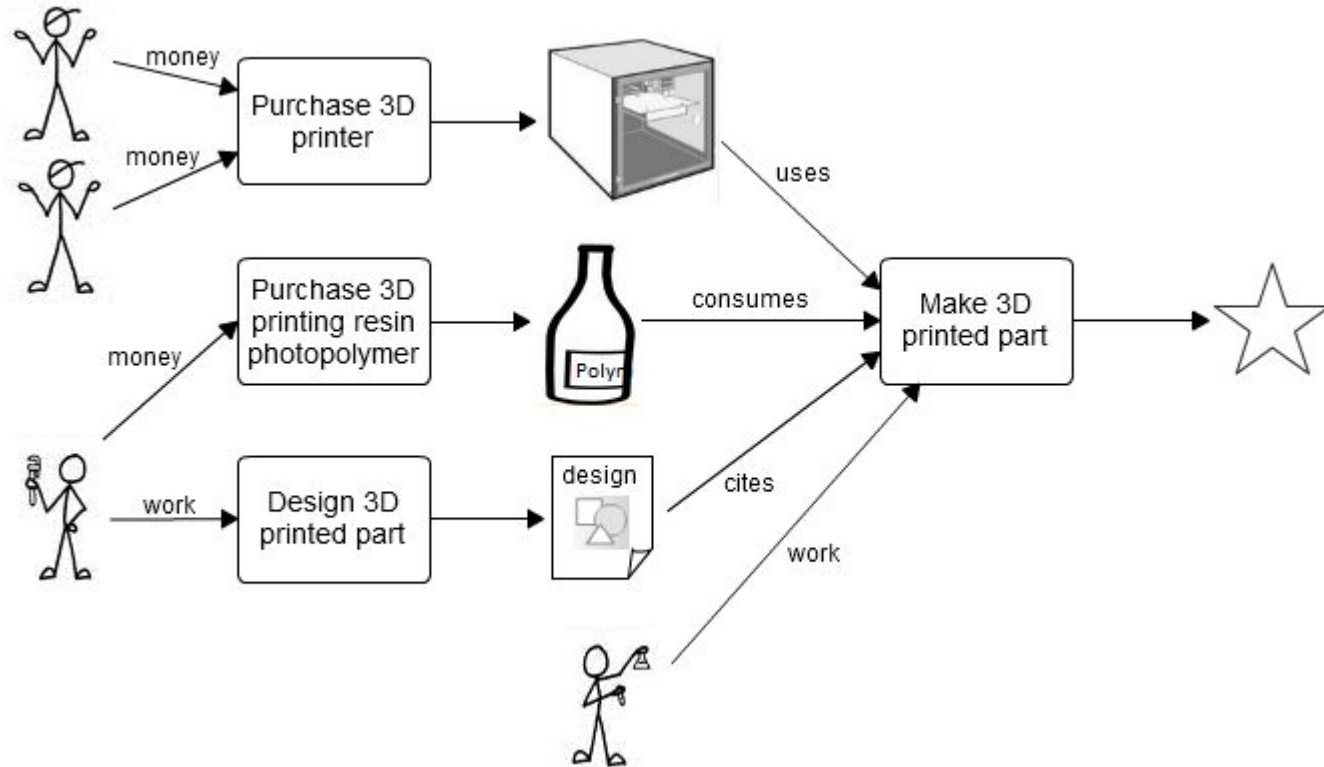

Here's an example Salsa flow

NRP round trip example

https://docs.google.com/presentation/d/1zZ2CbjxY6f-O6pgMnuj1IIv0B0oFt_tl7SpK7JKqxF0/edit?usp=sharing
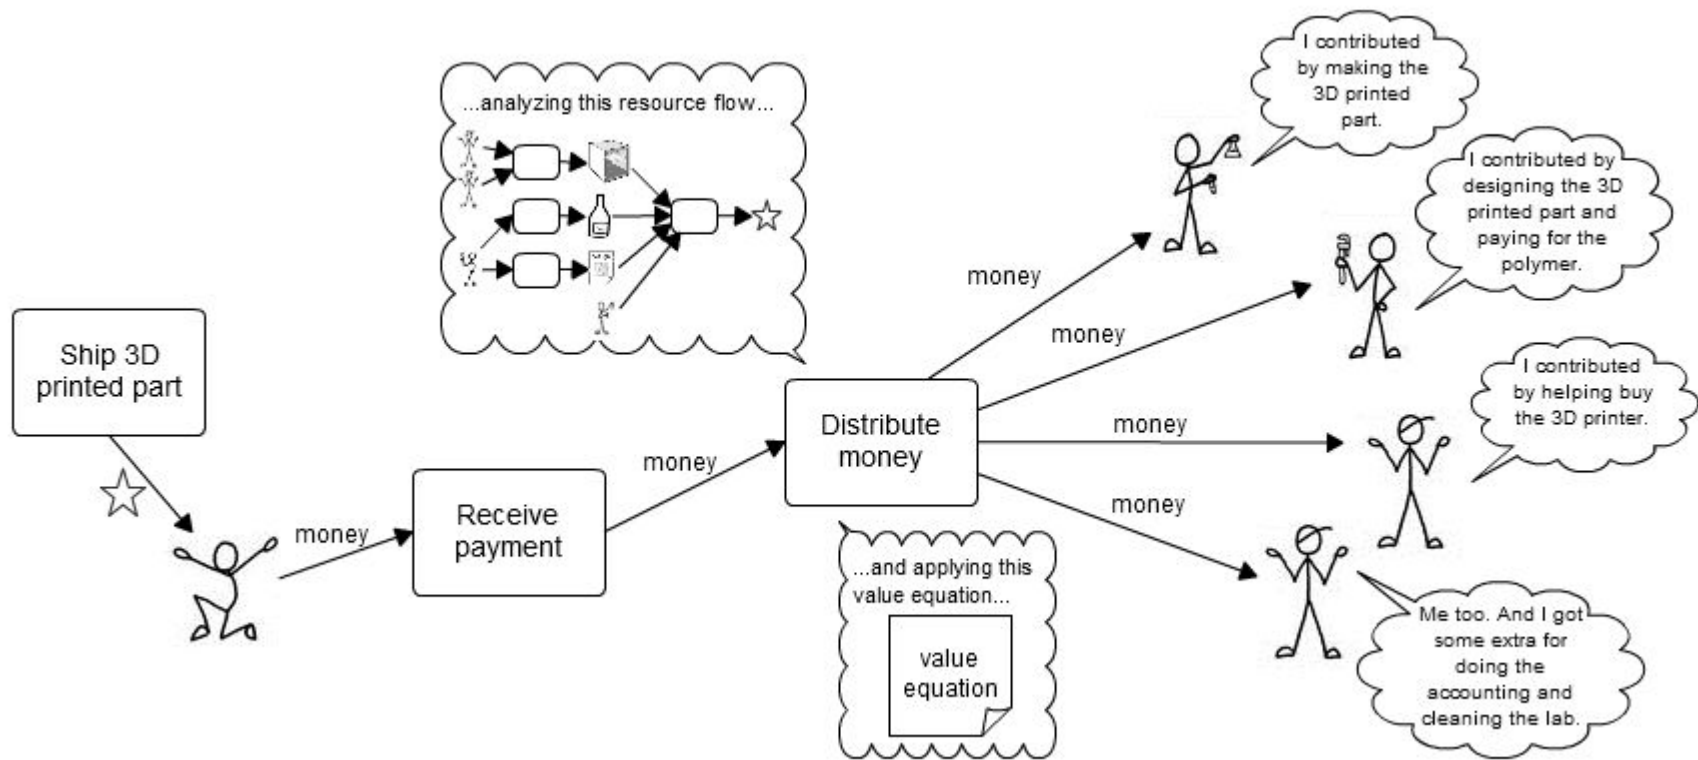

This is NRP hardware oriented, but is a simple (but not too simple) example of traversing the value chain.

The following 2 slides are a short version.

Here is the resource flow for creating the product...

Here is how the income gets distributed...

Everything is connected

https://docs.google.com/presentation/d/1cMDVLAfV6JLBZA-0kHmKcAWfsm68AL6mPQMvrVKGyVA/edit?usp=sharing

This slide deck is the NRP model (not updated for VF, but I'll do that at some point), walking through the data connections.

ValueFlows doc

http://valueflo.ws

That's the release doc.

The biggest holes are:
- Intents (requests/offers)
- Recipes (for process and exchange)
